PROJECTS

Food Appointment System
Technologies: React.js, Bootstrap 5, Node.js, java, springboot,MySQL,JWT,Rozorpay,Cloudnary

- A web platform to improve dining experiences by allowing customers to book food appointments at restaurants.
- Users can book meals in advance, browse menus and prices, pay 25% upfront via Razorpay, and receive real-time email updates.
- Helps reduce waiting times and streamline restaurant workflow during peak hours.
- Backend features JWT authentication and an email notification service.

Smart Farm Management System

Technologies: Android Studio,Flutter,Dart,Firebase,PDF API

- Developed a Flutter-based mobile application for farmers to manage crop records, plots, pesticide schedules, and fertilizer usage.
- Implemented offline data storage and CRUD operations for efficient crop and input management without internet connectivity.
- Integrated PDF report generation to create and export detailed summaries of farming activities and expenses.

Cloud-Based Video Streaming Platform
Technologies: React.js, Bootstrap 5, Node.js

- A platform allowing users to upload, stream, and interact with videos, similar to YouTube.
- Videos are stored in Supabase and processed into multiple resolutions using FFmpeg for adaptive streaming.
- Features include likes, watch later, and channel subscriptions.
- Adaptive streaming adjusts quality based on internet speed; users can also select resolution manually.

EDUCATION

B.Tech in Computer Science & Engineering
Sinhgad College of Engineering, Pandharpur *2022–2026*
CGPA: 9.33/10

HSC - Science
Sangola Vidyamandir Prashala Jr. College *2022*
Percentage: 57.00%

SSC
DBK Sambhajirao Shende Vidyalaya, Medshingi *2020*
Percentage: 83.40%

INTERNSHIP

QSpiders - Software Testing Training Institute

Software Development Intern *Dec 2025 – July 2026*

- Completed hands-on training in Java, SQL, HTML, CSS, JavaScript, and Software Development concepts.
- Solved coding problems and developed mini applications to strengthen programming and problem-solving skills.

SKILLS

Programming Languages: C, Java

Web Technologies: HTML, CSS, Basic JavaScript

App Development: Android Studio (Java - Basics)

Database: SQL, MongoDB

Other: Basic Data Structures and Algorithms in Java, Git, GitHub

PROFESSIONAL SKILLS

- **Problem Solving:** Identified a real-world issue where students waste time finding food on Sundays. Built a Food Appointment System and successfully convinced two restaurant owners to adopt it.
- **Creativity:** Innovative in problem-solving and designing efficient solutions for real-world challenges.

CERTIFICATIONS

- AI for Students: Build Your Own Generative AI Model – NxtWave
- PHP and MySQL Training – Spoken Tutorial
- Python Training – Spoken Tutorial

HOBBIES & INTERESTS

- Learning new technologies
- Listening to music
- Traveling
